## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Drawings*

2. The drawings are objected to because: Figures 2b, 6a, and 6b should be designated by a legend such as --Prior Art-- because in order to clarify what is applicant's invention. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4-10, and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gough (3,612,136).
5. Claims 1, 2, 4, 8, 10, and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mirtain (3,881,492).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 3, 13-16 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gough (3,612,136).

See paragraph 4 above: it would have been obvious to one of ordinary skill in the art to provide such conventional features in the above tire.

8. Claims 3, 13-16, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mirtain (3,881,492).

See paragraph 5 above: it would have been obvious to one of ordinary skill in the art to provide such conventional features in the above tire.

9. Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gough (3,612,136) in view of Ubukata et al. (6,260,596 B1) or, alternatively, Mirtain (3,881,492) in view of Ubukata et al. (6,260,596 B1).

See paragraphs 4 and 5 above: it is well known to align cord direction of a ply all in the same direction or symmetrically with respect to a vehicle centerline in order to adjust cornering and steering properties, as evidenced by Ubukata et al. (embodiments of Figures 2-5) for example; it would therefore have been obvious to one of ordinary skill in the art to provide such well known cord alignment when mounting a set of the tires on a vehicle in order to adjust cornering and steering properties.

***Allowable Subject Matter***

10. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
